

*School District of
Niagara*

Welcome to the School District of Niagara where families of neighboring districts have made our district the local choice to educate their children through the process of Open Enrollment. In Niagara we take pride in being a desirable school district in Northeast Wisconsin where families recognize the passion to succeed, and the opportunity for children to grow, and develop 21st Century skills. Our district takes pride in preparing students to be college and career ready. By recruiting and retaining quality educators, we have developed a highly trained team that is equipped and motivated to educate the whole child.

We offer students the ability to participate in a number of athletic events from fall to spring, along with performing and fine arts. For a rural Wisconsin school district Niagara offers students a full menu of extra-curricular activities that allow them to learn team skills and the ability to develop leadership qualities. In Niagara we are eager to compete and prepare our students for success by setting and attaining goals.

The School District of Niagara offers free morning and afternoon childcare for students K-6th grade. We also offer free breakfast and lunch programs for 4K-6th grade students. After school intervention and homework help is also provided for students in grades K-12 if the need is desired.

We take pride in our ability to schedule intervention time during the regular school day to provide extra help for students in specific content areas along with enrichment time for those that are gifted and need to be challenged.

Niagara's Special Education Department provides specific plans for students so they can succeed through the program and achieve goals to prepare them for life-long success.

Our school district believes that we are the educational choice for your family whether you live in district or utilize the open-enrollment process to join our success.

Yours in education,
